Mosaic BINGO

You need to check all the grids that meet the conditions

Exactly **3** of the four surrounding grids are checked	Exactly **5** of the six surrounding grids are checked	Exactly **5** of the six surrounding grids are checked	Exactly **3** of the six surrounding grids are checked	Exactly **3** of the four surrounding grids are checked
Exactly **5** of the six surrounding grids are checked	Exactly **7** of the nine surrounding grids are checked	Exactly **7** of the nine surrounding grids are checked	Exactly **6** of the nine surrounding grids are checked	Exactly **5** of the six surrounding grids are checked
Exactly **6** of the six surrounding grids are checked	Exactly **5** of the nine surrounding grids are checked	Exactly **6** of the nine surrounding grids are checked	Exactly **1** of the nine surrounding grids are checked	Exactly **4** of the six surrounding grids are checked
Exactly **6** of the six surrounding grids are checked	Exactly **4** of the nine surrounding grids are checked	Exactly **2** of the nine surrounding grids are checked	Exactly **4** of the nine surrounding grids are checked	Exactly **1** of the six surrounding grids are checked
Exactly **2** of the four surrounding grids are checked	Exactly **4** of the six surrounding grids are checked	Exactly **3** of the six surrounding grids are checked	Exactly **1** of the six surrounding grids are checked	Exactly **2** of the four surrounding grids are checked

1. The solution must have at least one row, one column, or one diagonal where all five elements are checked.

2. If a grid is not checked, the condition written in the grid must not be satisfied.

3. The solution is unique.

4. Random seed: 19260817, number of iterations: 1
